

# AMRIT SAGAR SUHANEY

+91-8253024879 • S24cseu1563@bennett.edu.in • Greater Noida, Uttar Pradesh

## SUMMARY

Results-driven Front-end Developer and passionate AI/ML learner with expertise in designing and implementing scalable web applications. Skilled in React.js, Node.js, Python, and ML/AI workflows. Effective problem solver who builds full-stack applications and boosts model performance through hands-on academic and real-world projects.

## EXPERIENCE

### Data Science & GenAI Intern

Innomatics Research Labs

08/2023 – 11/2023 | Greater Noida, UP

- Gained hands-on experience in Python, EDA, ML basics, and AI/GenAI concepts.
- Worked on real-world datasets and solved analytical problems using data science techniques.
- Gained exposure to Generative AI workflows and industry best practices.

## EDUCATION

### Bachelor of Technology (B.Tech) — Computer Science

Bennett University, Greater Noida

08/2024 – 2028

- Relevant coursework: Data Structures, Algorithms, Machine Learning, Web Development.
- Active participant in coding clubs and AI/ML workshops on campus.

### 12th Grade (Science — PCM)

Maharishi Vidya Mandir, Shahdol

08/2023 – 05/2024

- Secured strong academic performance in Physics, Chemistry, and Mathematics.

### 10th Grade

Maharishi Vidya Mandir, Shahdol

08/2021 – 05/2022

- Achieved distinction in all core subjects with focus on Mathematics and Science.

## SKILLS

### Languages

Python, JavaScript, TypeScript, HTML, CSS

### Frontend

React.js, Tailwind CSS, Bootstrap

### Backend

Node.js, Express.js, Flask

### Databases

MongoDB, SQLite

### AI / ML

Machine Learning, Deep Learning, NLP, EDA, Generative AI

### Tools

Git, VS Code, REST APIs, Socket.IO, Vercel, Render

## PROJECTS

### Ads CTR Prediction Engine

2024 – 2025

- Built an AI-powered Ads CTR Prediction Engine using ML, React.js and Node.js.
- Developed responsive web pages with React.js and Tailwind CSS.
- Boosted ML model prediction accuracy to 90.6% through feature engineering.
- Full-stack architecture: React.js, Express.js, SQLite, and TypeScript.

### Vision Fit – AI-Powered Fitness Tracker

01/2026 – 03/2026

- Built a real-time fitness tracking web app using React and computer vision-based pose detection to count reps and provide form feedback.
- Developed Flask + SQLite backend and implemented Socket.IO for real-time updates.
- Deployed using Vercel and Render for a scalable, production-ready setup.

### Voice Assistant

02/2023 – 05/2023

- Developed a voice-activated agent capable of executing tasks via verbal commands.
- Applied Python scripting, Speech Recognition, TTS, NLP, and API Integration.
